Alternative to
real stone**

RockNest is a new type of lightweight, easy-to-install faux stone panel that perfectly mimics the appearance of real stone.

RockNest is made of polyurethane (PU). Polyurethane is a family of plastics, or more specifically, elastomeric polymers, that includes rubber, which, since first invented in 1937, have been adapted to produce a broad spectrum of products. The material is exceptionally versatile, durable, flexible, adaptable, and resilient.

PRO TIPS

- Use solid rather than hollow fluted panels to achieve a more premium feel.
- The termination edge for SoliFlute can be easily cut without touch-up.
- Less jagged edges when cutting solid fluted panels.
- Pair with FlexLam series panels to give more exciting design combinations.

INSTALLATION GUIDE: <https://drive.google.com/file/d/1in900H-XQ62hY22bJNsillqjAqHdsYfC/view?usp=sharing>

PRO TIPS

- Save costs by eliminating the need for plywood backing and laminate.
- For clean edge panel-to-panel termination, utilize our available accessories.
- You can directly apply it to flat plastered walls or use a gypsum board backing.
- Bamboo fiber is water proof and does not expand.
- Linear lighting can be incorporated between panels as a feature.

Similar to FlexLam, MarbleLux is made of bamboo based composite but the surface is using PET coating

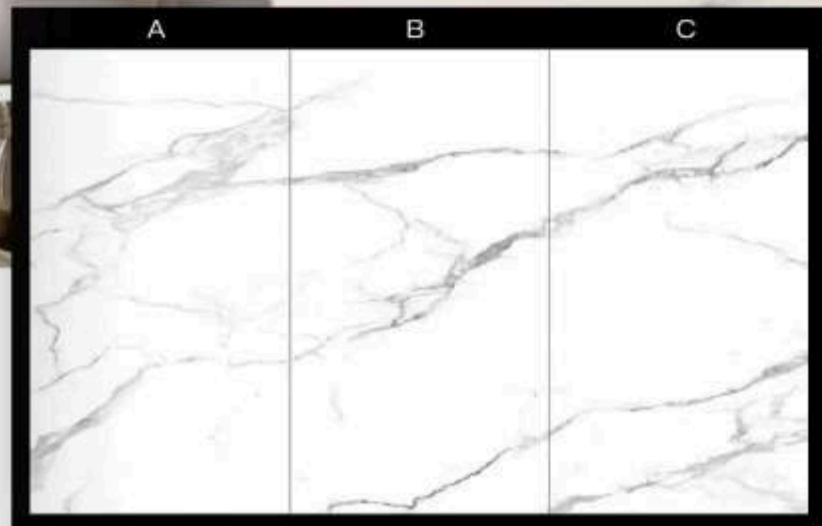

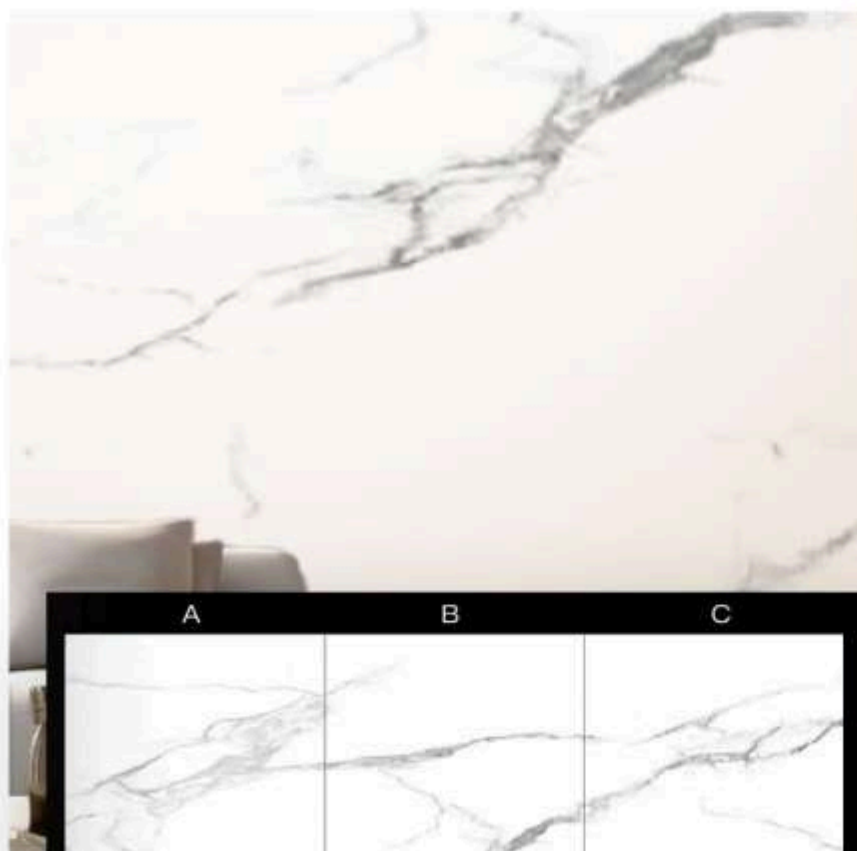

Polyethylene terephthalate(PET) refers to a chemical compound that is a form of thermoplastic polymer resin that is widely used as a fiber for clothing, thermoforming for manufacturing, and producing engineering resins. It is also used as a corrosion preventative coating.

PET coating is extremely temperature resistant and provides good sealability and an excellent oxygen and fat barrier.
